VOLUME 1

Invited keynote lectures

Environmental Hydraulics and Sustainability: Some lessons from recent past 3
H.J.S. Fernando

Severn Barrage and other tidal energy options: Environmental hydraulics studies 13
R.A. Falconer, J. Xia & B. Lin

A post-operation audit of the Tai Hang Tung Storage Scheme 27

Retrospective evaluation of an implemented computer-optimized groundwater-remediation design 39
G.F. Pinder & J.F. Guarnaccia

Integrating hydraulic, hydrology and environmental economy models for the protection and sustainable use of transboundary water resources 49
J. Ganoulis & Ch. Skoulikaris

Fundamentals of environmental fluid mechanics Theoretical, field and experimental study on internal wave dynamics in rotating stratified basins 63
H. Ulloa, C. Rozas, A. de la Fuente & Y. Nino

The effects of topography on mixing rates in controlled exchange flows 69
G O. Hughes, T. Prastowo, R. W. Griffiths & A.MeC. Hogg

Influence of interaction between submerged longitudinal vegetation zone on generation of large scale organized horizontal vortices 75
T. Tanaka & T. Ohmoto

Mean flow structure and advection of instantaneous coherent-flow pattern around T-type and L-type groynes 81
A.Kadota & K. Suzuki

</tbody>
</table>
Simplified estimates of trajectory of inclined negatively buoyant jets  
G.C. Christodoulou & I.G. Papakonstantis  

Boundary interactions of horizontal brine discharges  
D. Shao & A. WK. Law  

Buoyancy considerations for integrated discharges  
M.J. Wood, C.T. Mead & B.R. Wild  

Modelling the front condition of rigid boundary gravity currents  
R.I. Nokes, J.D. McBryde, M.J. Davidson & M.J. Allis  

Gravity-driven flows running over porous media with different lower boundary conditions  
B.M. Marino & L.P Thomas  

Effect of reservoir bed slope and density current discharge on water entrainment  
S.M. Kashefipour, F. Kooti & M. Ghomeshi  

Entrainment by katabatic winds  
J. Buhler, M. Princevae & A.J. Sehleiss  

**Environmental hydraulics of inland waters**  

Simultaneous measurements of velocity and plant motion in open-channel flows with flexible vegetations  
I. Nezu & T. Okamoto  

Resistance and turbulence structure in open-channel flows with flexible vegetations  
T. Okamoto & I. Nezu  

Laboratory measurement and analysis of hydraulic parameters in vegetated river flows  
J.Z. Shi, Y.-H. Li, J.M.R. Hughes & M. Zhao  

Effect of biocclusion factor on vegetated channel resistance  
D. Souliotis & P. Prinos  

Flow characteristics in vegetated compound channels  
X. Sun, K. Shiono & T.L. Huang  

Turbulence structure of compound open-channel flows with one-line emergent vegetation  
M. Sanjou, I. Nezu, S. Suzuki & K. Itai
Effects of depth variation of vegetation density on vertical mixing
S. Ghazvinizadeh & M. Jamali

Bioengineering in front of a river dike: Wave attenuation by vegetation

Long term prediction of vegetation expansion on gravel bed river with active bar migration
Y. Toda, T. Tsujimoto & M. Tsuchiya

Parameters used in modeling sediment-laden flow in open channels
P. Wu & Y.C. Jin

An integrated mathematical model for analysis of hydrodynamics and water quality in rivers
AJ. Stamou & E.M. Douka

Two-dimensional finite element model for analysis of heat transport in rivers
I. W. Seo, H.J. Choi & C.G. Song

Predicting travel time in natural streams, using a Monte Carlo simulation
S. Solis, I. Guymer & R. Dutton

A modeling approach for organic sediment resuspension and oxygen demand in Bubbly Creek, Chicago, Illinois
D. Motta, M.H. Garcia & J.D. Abad

Effective countermeasures to long-term turbid water effluence from the Hitotsuse Dam Reservoir
T. Murakami, H. Nakayama, S. Mizuguchi, S. Sugio & N. Ootawara

Impact of river training on the hydraulics of Shenzhen River
S.N. Chan & J.H. WLee

Numerical modeling of river bed evolution in abrupt hydraulic changes
E.D. Farsirotou, J. V Soulis & PG. Lokkas

Influence of saline intrusion during the dry season in Red river and Thai Binh river systems, Vietnam
N.H. Due, T. Shintani & M. Umeyama

Standing waves in the Quequen Grande River Estuary, Argentina, detected from velocity measurements
L.P. Thomas, B.M. Marino & M.G. Pereyra
Modeling the tidal bore on the Qiantang River, China: An application of FVCOM
D.F. Xie, C.H. Pan & X.G. Wu

Analysis of flow regime changes due to operation of large reservoirs on the
Zambezi River

On the experiences of flood control schemes application in the Golestan
province (Iran)
A. Ghezelsofloo, A. Deiminiat, H. Shojaeer & R. Lotfi

Hydrologie and hydraulic computations for watercourse demarcation in Greece
E.I. Dan iii, S.N. Michaś & G.S. Aerakis

A numerical study on characteristics of flood propagation in simplified
urban areas
WC. Jeong, Y.S. Cho & J.W. Lee

Process oriented modeling of Lake Ontario hydrodynamics
L. Boegman & Y.R. Rao

3-D simulations of flows in the reconstituted lake Karla, Thessaly, Greece
H. Neveskotis, K Tserdani, I.E. Sarris, T.E. Karakasidis & A. Liakopoulos

Sensitivity of MITgcm to different model parameters in application to Cayuga Lake
A. Dorostkar, L. Boegman, RJ. Diamessis & A. Pollard

Modeling the fate of oxygen artificially injected in the hypolimnion of a lake with
multiple basins: Amisk Lake revisited
E. Rueda, V. Singleton, M. Stewart, J. Little & G. Lawrence

Generation mechanism of typical vertical distributions of dissolved oxygen in the
northern part of Lake Biwa
T. Hosoda & E Malembeka

River inflow mixing in a stratified reservoir
E. Rueda, A. Cortes, I. de Vicente, M.A. Escobar, A.B. Hoyer,
W. Fleenor & E. Moreno

1-D Hydrodynamic modeling of Greek lakes and reservoirs
S. Karalis & A. Chioni

Surface water inflow to wetlands in Blanco River sub basin
E.A. Sanchez Camacho
Hydrological characteristics of swamp communities, the Biebrza River (NE Poland) case study
T. Okruszko, J. Chormanski, D. Miroslaw-Swiątek & M. Gregorczyk

Application of a mathematical model for nutrient pollution assessment in a small catchment of the Latrobe River Basin, Australia
Md. Jahangir Alam & D. Dutta

**Environmental hydraulics of coastal waters**

Numerical modeling of non-hydrostatic free-surface baroclinic flows induced by suspended particles
O. Nesterov

Large-wave simulation of three-dimensional wave breaking over constant-slope beach
A.S. Dimakopoulos & A.A. Dimas

Bed equilibrium during water wave propagation over ripples
G.A. Kolokythas & A.A. Dimas

Near-bottom instabilities under fully nonlinear waves of depression
T. Stefanakis & P.J. Diamessis

SPH numerical simulation of surf zone characteristics
C. Makris, Y. Krestenitis & C. Memos

Velocity profiles of sea currents
F. De Serio & M. Mossa

Oscillatory flow velocities through vegetation fields: Laboratory observations
M DiNatale, M. Ciarmiello & A. Di Nardo

Large scale experiments on spectral wave propagation over Posidonia oceanica seagrass
E. Manca, V. Stratigaki & P. Prinos

Attractors for the entrance state of a tidal estuary
B.C. Wilson, J.B. Hinwood & E.J. McLean

Response of an estuary to transient river flow variation
J.B. Hinwood & E.J. McLean

Generation mechanism of wind-induced Langmuir circulation
M. Sanjou, I. Nezu & Y. Akiya

Oil Spill Modelling as a tool for coastal pollution control
N. Donia

Environmental hydraulics framework of the design of discharges from desalination plants

Methodology for the implementation of the WFD combined approach:
Environmental Mixing Zones for outfall discharges into coastal waters
A. Freire, J. Juanes, J. Revilla, X. Guinda, A. Garcia, C. Alvarez & K Nikolov

Parameter sensitivity analysis of the performance of Galician Submarine Outfalls:
Physical modeling
I.Mera, J. Anta, A. Louro & E. Pena

Improvement in preconditioning treatment system of Santos Submarine Outfall
E.L. Subtil, J.C. Mierzwa & J.P. Ortiz

Coastal beach salinity prediction using data-driven and deterministic approaches
W. Thoe, H C. Wong & J.H. W. Lee

Laboratory measurements of hydrodynamics and sediment transport in the swash-zone
G.A. Kikkert, T. O 'Donoghue & D. Pokrajać

Berm breakwater against wave overtopping - An experimental study
E.N. Anastasaki, VK Tsoukala & C.I. Moutzouris

Breakwaters' impact on Egypt's north coast equilibrium
G.H. Elsaeed

Environmental impact assessment of dredging deep in the navigation channel of the Port of Santos
J. C. C. Amorim, K Bundgaard & B. Elfrink

VOLUME 2

Environmental hydraulics of groundwater

Estimation of seawater intrusion front in a coastal karstified system using a density-dependent flow approach
M.P Papadopoulou, Z. Dokou, G.P Karatzas, & C.I. Zahariadi
Seawater intrusion in coastal aquifers under drought and transient conditions
G. Kopsiaftis & A. Mantoglou 637

Stochastic simulation of seawater intrusion considering random rainfall events
VC. Christelis & A. Mantoglou 643

Design criteria for cut-off walls as countermeasure to saltwater intrusion
A.I. Ziogas & VK. Kaleris 649

A stochastic framework for the analysis of tidal effects in heterogeneous coastal aquifers

Combined simulation-optimization of a coastal aquifer by using genetic algorithm
K. Demirbas, A.B. Altan Sakarya & H. Onder 661

A computational model for the optimal management of coastal aquifers
S.K. Arvanitidou, C.G. Koutitas, K.L. Katsifarakis & G.H. Pechlivanidis 667

Response of LNAPL fuel and groundwater to forcing by sea level and rainfall recharge
C.D. Johnston & M.G. Trefry 673

Characteristics of flow in fractures: An experimental study
VG. Tzelepis, J.N.E. Papaspyros, K Moutsopoulos & V. Tsihrintzis 679

Optimal management of a polluted fractured aquifer, using genetic algorithms
Y.N. Kontos, M.I. Katirtzidou, M.A. Kizeridou & K.L. Katsifarakis 685

Quantification of artificial neural network uncertainty with bootstrap percentile intervals for the prediction of a karstic aquifer's response
I.C. Trichakis, G.P. Karatzas & I.K. Nikolos 691

Theoretical analysis and numerical simulations for unsteady stormwater Storage into granular sub-base
B. Ghimire & T. Hosoda 697

Modelling of groundwater flow and contaminant removal in horizontal subsurface flow constructed wetlands
K. Liolios, K. Moutsopoulos, V. Tsihrintzis & C. Akratos 703
Interfacial processes

Effect of the slope of short fetch wind-driven waves on the oxygen transfer in a water body
A. Tamburrino & L. Ravo 711

Energy transfer properties among mean, wave and turbulence components in open-channel flows with wind-induced water waves
M. Sanjou & I. Nezu 717

Evaluation of a sea surface roughness model and drag coefficient
I. Papadimitrakis & B. Carlsson 723

Numerical modeling of dissolved oxygen recovery during aeration in lakes
N. Jacimovic, M. Ivetic, T. Hosoda & H.-D. Park 729

Bubble-water mass transfer from plunging jet spillways
J.S. Gulliver & J. Groeneveld 735

How biofilms influence seabed morphology
M. van Damme, R.R. Simons, M.J.E Stive & B.C. van Prooijen 741

Turbulence and chronic detachment of epilithic biofilm in artificial rough channel flow

Experimental and numerical analysis of sediment nutrient uptake in a channel flow
M. Gonzalez-Sanchis, EA. Comin, J. Murillo & P. Gareia-Navarro 753

Modelling of phosphorus adsorption in estuarine sediment
E.Al-Enezi, Y. Al-Osairi, B.N. Boekelmann-Evans & R.A. Falconer 759

Quantifying hyporheic exchange coefficients using the EROSIMESS-system

Modelling the impulses causing entrainment of coarse grains by means Of Extreme Value Theory
M. Valyrakis, P. Diplas & C.L. Dancey 771

Wavelet based analysis of energetic events leading to entrainment of coarse grains
M. Valyrakis, P. Diplas & C.L. Dancey 777
Sediment flux dynamics in turbulent unsteady open-channel flow over a gravel bed
F. Bagherimiyab & U. Lemmin

Experimental observations and simulation of non-equilibrium bed load transport of graded bed material
N.P. Efthymiou, E Eberl & P. Rutschmann

Effect of particle size on local scour of cohesive sediments
M.H. Omid & H. Hamidifar

An experimental study on the process of dune transition under unsteady water flow
Y. Hirai, S. Kawamura, Y. Shimizu & I. Kimura

Local scour and development of sand wave around a permeable groyne of stone gabion
A. Kadota, K. Suzuki & T. Fushimi

Bed topography of river bend due to horizontal footing
M. Shafai Bejestan & A. Rezania

Hydraulic jump with sediment laden flow in a rectangular channel
M.H. Omid & M. Nasrabadi

Field measurements and experimental techniques

The effect of Reynolds number on junction flow dynamics
N. Apsilidis, P. Diplas, C.L. Dancey & E Sotiropoulos

A combined system of an H-ADCP and numerical simulation for continuous discharge monitoring
H. Iwamoto & Y. Nihei

Development of automatic water discharge measurement system
A. Yorozuya, Y. Kanno, K. Fukami & K. Oodaira

Boat and bed load motion effects on velocity profiles measured with an acoustic Doppler current profiler
J. Petrie, P. Diplas, S. Nam & M.S. Gutierrez

Deriving continuous hydrodynamic data from non-synoptic measurements in the St. Lawrence fluvial estuary
P. Matte, Y. Secretan & J. Morin

Evaluating the performance level of a water distribution network under unbalanced operating conditions - The case of Kos town (GR)
V Kanakoudis & S. Tsitsifli
**Ecological aspects**

Flow structure and resulting sediment patterns around fish habitat structures in mountainous streams  
A.N. Papanicolaou, A.G. Tsakiris & C.M. Kramer  

Developing sustainable environments for aquatic life: The effects of boulders on regulating sediment deposition in gravel-bed rivers  
D.C. Dermisis & A.N. Papanicolaou  

Application of genetic algorithm to improve the fuzzy logic river habitat model  
R. Li, Q. Chen, D. Chen & D. Chen  

Experimental and numerical evaluation of sixteen different designs of vertical slot fishways  
M. Bermudez, J. Puertas, L. Cea, L. Pena & L. Balairón  

Proper-orthogonal basis decomposition of spatio-temporal flow evolutions modified by cylinder in a vertical slot fishway  
D. Calluaud, R. W. Wang, G. Pineau & L. David  

Do ecological flows benefit exotic species?  
I. Boavida, A.N. Pinheiro & R. Cortes  

A model of flushing-flows in open-channel for fixed algae removal  
O. Fovet, G. Belaud, X. Litrico, S. Charpentier, P. Dollet, C. Bertrand & C. Hugodot  

Analysis of the environmental flow requirement incorporating the effective discharge concept  
D. Zarris  

Optimization model of reservoir operation under ecological flow constraint: The case of cascade dams on Yalongj iang River, China  
D. Chen, Q. Chen, R. Li & D. Chen  

Types of artificial water bodies in the Aegean islands (Greece), their Environmental impact and potential value for biodiversity  
N.M. Georgiadis, K Paragamian, T. Giannakakis, D. Poursanidis & G. Catsadorakis  

**Environmental hydraulics and global climate change**

Climate change impacts on the hydrodynamic characteristics of the southern part of Aswan High Dam reservoir, Lake Nubia  
M. Elshemy & G. Meon
Influence of the urban heat island parameterization on precipitation forecasting in limited area model
A. Cantelli, P. Monti & G. Leuzzi

Downscaling output of global climate models with application to aquifer thermal regimes in the Sendai plain, Japan
L.N. Gunawardhana & S. Kazama

Potential climate change impacts on South African aquifers
S.R. Dennis & I. Dennis

Mean sea-level rise impacts on coasts and sea harbours of Sao Paulo State, Brazil
E. Arasaki, W.C. Sousa Junior & P. Alfredini

Drag coefficient and secondary motion of free falling cylindrical particles
A. C. Chow & E.E. Adams

Modeling the impact of CO$_2$ releases under water
PD. Yapa, A.L. Dissanayake, K Nakata & Y. Ishihara

Analysis of the risk distribution of slope failure in Thailand by the use of GIS data
K. Ono, S. Kawagoe & S. Kazama
