</table>
135 Effects of longitudinal road waviness on vehicle vibration response / O. Kropec, P. Mucka
155 Nonlinear optimal integrated vehicle control using individual braking tongue and steering angle with on-line control allocation by using state-dependent Riccati equation technique / T. Acarman
179 Development and implementation of a tongue vectoring algorithm for an innovative 4WD driveline for a high-performance vehicle / F. Cheli, F. Cimatti, P. Dellacha, A. Zorzutti
195 New model and simulation of Macpherson suspension system for ride control applications / M.S. Fallah, R. Bhat, W.F. Xie
221 An efficient Newton method for general motorcycle kinematics / A. Saccon, J. Hauser
243 The IMMa optimisation algorithm without control input parameters / A. Ortiz, J.A. Cabrera, A. Guerra, A. Simon
Hybrid state-feedback sliding-mode controller using fuzzy logic for four-wheel-steering vehicles / A. Alfi, M. Farrokhi

Dynamics of railway wagons subjected to braking/traction torque / Z. Zhang, M. Dhanasekar

Effects of the guideway's vibrational characteristics on the dynamics of a Maglev vehicle / H.S. Han, B.H. Yim, N.J. Lee, Y.C. Hur, S.S. Kim

The effect of worn profile on wear progress of rail vehicle steel wheels over curved tracks / M.A. Rezvani, A. Owhadi, F. Niksai

A dummy for the objective ride comfort evaluation of ground vehicles / M. Pennati, M. Gobbi, G. Mastinu

A study of locomotive driver's seat vertical suspension system with adjustable damper / G.J. Stein, P. Mucka, T.P. Gunston
Virtual durability test rigs for automotive engineering / K. Dressler, M. Speckert, G. Bitsch
Fault detection of vehicle suspension system using wavelet analysis / S. Azadi, A. Soltani
Engine mount optimisation for vibration isolation in motorcycles / S. Kaul, A. K. Dhingra
Comparative study of Hilbert-Huang transform, Fourier transform and wavelet transform in pavement profile analysis / A. Y. Ayenu-Prah, N. O. Attoh-Okine
How significant are transfer function relations and invariant points for a quarter car suspension model? / D. Karnopp
Application of observer-based fault detection in vehicle roll control / B.P. Jeppesen, D. Cebon
Friction coefficient measurement for autonomous winter road maintenance / G. Erdogan, L. Alexander, R. Rajamani
513  On vehicle/track impact at connection between a floating slab and ballasted track and floating slab track's effectiveness of force isolation / Z.G. Li, T.X. Wu
533  Optimisation of handling and traction in a rear wheel drive vehicle by means of magneto-rheological semi-active differential / Raffaele De Rosa, Michele Russo, Riccardo Russo, Mario Terzo
551  Mathematical modelling of train-turnout interaction / S. Alfi, S. Bruni
575  Experimental analysis of tyre-enveloping characteristics at low speed / Yeysel Alkan, Steven M. Karamihas, Gunay Anlas
589  Driver model for the analysis of pre-accident situations / R. Jurecki, T.L. Stańczyk
613  Limit braking of a high-performance motorcycle / R.S. Sharp
627  Nonlinear dynamic behaviour of a railway wheelset / Utz von Wagner
641 Rotational vibration absorber for the mitigation of rail rutting corrugation / Christophe Collette, Mihaita Horodinca, Andre Preumont

661 Deterioration mechanisms in the wheel-rail interface with focus on wear prediction: a literature review / Roger Enblom

701 Stability measurement of high-speed vehicles / Steven C. Peters, Karl Iagnemma

721 Influence of creep forces on the risk of derailment of railway vehicles / J. Santamaria, E.G. Vadillo, J. Gotnez

753 A study on the effect of different tyre imperfections on steering wheel vibration / N. Balaramakrishna, R. Krishna Kumar
771 Development and validation of a numerical model for predicting forklift truck tip-over / Jemme Rebelie, Pierre Mistrot, Richard Poirot

805 The performance improvements of train suspension systems with mechanical networks employing inerters / Fu-Cheng Wang, Min-Kai Liao, Bo-Huai Liao, Wei-Jiun Su, Hsiang-An Chan

831 Analysis of lateral tyre friction dynamics / Josko Deur, Nenad Kranjčević, Otto Hofmann, Jahan Asgari, Davor Hrovat

851 Model reduction in vehicle dynamics using importance analysis / Tulga Ersal, Burit Kitírungsi, Hosam K. Fathy, Jeffrey L. Stein

867 Dynamic simulation of railway vehicles: wheel/rail contact analysis / Jury Auciello, Enrico Meli, Stefana Falami, Monica Malvezzi
Analysing classes of motion drive algorithms based on paired comparison techniques / P.R. Grant, M. Blommer, B. Artz, J. Greenberg

Speed-independent vibration-based termin classification for passenger vehicles / C.C. Ward, K. Iagnemma

A fuzzy approach to reconstructing vehicle-pedestrian collisions / D. Yangi

Comparative stability of bogie vehicles with passive and active guidance as influenced by friction and traction / A.H. Wickens

Optimal selection of suspension parameters in large scale vehicle models / G. Georgiou, S. Natsiavas

Condition monitoring of rail vehicle suspensions based on changes in system dynamic interactions / T.X. Mei, X.J. Ding
