Selected papers of the 7th International Conference of DAAAM Baltic, Industrial Engineering

3 Preface / Rein Küttner, Tauno Otto
4 In-process determining of the working mode in CNC turning / Tanel Aruväli, Risto Serg, Jürgo Preden, Tauno Otto
17 Ortophoto analysis for UGV long-range autonomous navigation / Robert Hudjakov, Mart Tamre
28 Method for in situ runout measurement of large rolls / Panu Kiviluoma, Esa Porkka, Jukka Pirttiniemi, Petri Kuosmanen
39 Modelling and experimental verification of mechanical properties of cotton knitted fabric composites / Olga Kononova, Andrejs Krasnikovs, Karlis Dzelzitis, Galina Kharkova, Angelina Vagel, Maris Eiduks
51 Evaluation of the operation expedience of technological resources in a manufacturing network / Kaia Lõun, Jüri Riives, Tauno Otto
66 Axial defect imaging in a pipe using synthetically focused guided waves / Madis Ratassepp, Sam Fletcher, Aleksander Klauson
76 Complete bifurcation analysis of driven damped pendulum systems / Mikhail Zakrzhevsky, Alex Klokov, Vladislav Yevstignejev, Eduard Shilvan
88 Analysis of surface roughness parameters achieved by hard turning with the use of PCBN tools / Anna Zawada-Tomkiewicz

100 Instructions to authors

103 Copyright Transfer Agreement
Editorial / Mart Min

The Baltic Electronics Conference BEC2010 - already for 12th time in Tallinn / Toomas Rang

Microfabrication of biomedical lab-on-chip devices. A review / Athanasios T. Giannitsis

Development of a method for optical monitoring of creatinine in the spent dialysate / Ruth Tomson, Fredrik Uhlin, Jana Holmar, Kai Lauri, Merike Luman and Ivo Fridolin

Generalized analytical model for SiC polytypic heterojunctions / Toomas Rang, Indrek Tabun, Galina Rang and Ants Koel

System-level optimization of NoC-based timing sensitive systems / Mihkel Tagel, Peeter Ellerveree, Thomas Hollstein and Gert Jervan

Short-time chirp excitation for wideband identification of dynamic objects / Toivo Paavle
183 Editorial / Mart Min
185 Hierarchical physical defect reasoning in digital circuits / Sergei Kostin, Raimund Ubar, Jaan Raik and Marina Brik
201 Bio-impedance signal decomposer: enhanced accuracy and reduced latency solution / Andrei Krivoshei
220 A method for mixing molten metal and compatible electric arc furnace / Heigo Mölder, Jaan Järvik, Kuno Janson, Rauno Gordon and Toomas Vaimann
241 Life-time characterization of LEDs / Kristo Paisnik, Galina Rang and Toomas Rang
252 Modelling of an inductive sensor of the Foucault cardiogram / Jüri Vedru, Rauno Gordon, Leo Henn Humal and Jaanus Trolla
271 Buckling of elastic beams by the Haar wavelet method / Ülo Lepik
Special issue on oceanography, meteorology and coastal engineering

287  Preface / Sirje Keevallik and Tarmo Soomere

289  Nonlinear interaction of large-amplitude unidirectional waves in shallow water / Ira Didenkulova, Efim Pelinovsky and Artem Rodin

301  Operational sea level forecasting in Estonia / Priidik Lagemaa, Jüri Elken and Tarmo Kõuts

332  Characterization of the temporal variability of Estonian mean precipitation series / Piia Post and Olavi Kärner

345  Temperature, humidity and wind from Estonian and Finnish radiosonde data (1993-2009) / Sirje Keevallik and Miina Krabbi

359  Linking wave loads with the intensity of erosion along the coasts of Latvia / Tarmo Soomere, Maija Viška, Jānis Lapinskis and Andrus Räämet

Oprac. BPK
