Application of Concurrency to System Design, the Eighth Special Issue

V Preface

1 A Scheduling Strategy for Synchronous Elastic Designs / Josep Carmona, Jorge Júlvez, Jordi Cortadella, Michael Kishinevsky

23 Saving Space in a Time Efficient Simulation Algorithm / Silvia Crafa, Francesco Ranzato, Francesco Tapparo

43 Compact Representations and Efficient Algorithms for Operating Guidelines / Niels Lohmann, Karsten Wolf

63 Flat Arbiters / Andrey Mokhov, Victor Khomenko, Alex Yakovlev

91 From Concurrent Multi-clock Programs to Deterministic Asynchronous Implementations / Dumitru Potop-Butucaru, Yves Sorel, Robert de Simone, Jean-Pierre Talpin

119 A Modal Interface Theory for Component-based Design / Jean-Baptiste Raclet, Eric Badouel, Albert Benveniste, Benoît Caillaud, Axel Legay, Roberto Passerone

151 Guaranteeing Weak Termination in Service Discovery / Karsten Wolf, Christian Stahl, Daniela Weinberg, Janine Ott, Robert Danitz
I  Preface.

181  Monadic Algebras: a Standpoint on Rough Sets / Marcin Wolski
197  An Investigation About Rough Set Theory: Some Foundational and
     Mathematical Aspects / Gianpiero Cattaneo
223  Rough Sets, Coverings and Incomplete Information / Inés Couso, Didier
     Dubois
249  Two Semantic Issues in a Probabilistic Rough Set Model / Yiyu Yao
267  Game-Theoretic Rough Sets / Joseph P. Herbert, JingTao Yao
287  Orthopairs: A Simple and Widely Used Way to Model Uncertainty / Davide
     Ciucci
305  Textures and Fuzzy Rough Sets / Murat Diker
337  On Some Mathematical Structures of T-Fuzzy Rough Set Algebras in
     Infinite Universes of Discourse / Wei-Zhi Wu
