SPIS TREŚCI

nr 1

5 The potential possibilities of usage of existing aerodromes and landing strips network in Poland in aspect of the "Small Aircraft Transport System" (SATS) conception / A. Kwasiborska, A. Stelmach

11 Modeling assumptions influence on stress and strain state in 450 t cranes hoisting winch construction / D. Gąska, T. Haniszewski, T. Matyja

21 Dynamic methods of air traffic flow management / J. Skorupski

29 The acquisition of real estate for the transport infrastructure elements building - legal aspects / M. Pawlicki, G. Karoń, J. Pawlicki

37 Information system in the function of railway traffic management / A. Pepevnik, M. Belšak

43 Application of the discriminant analysis at research of bearing ability of the wheel pair of the car / S. Krotov, V. Krotov

49 The viewpoints of chemical air pollution caused by traffic subsystems and presented by the example of emission measurements of trucks' exhaust gases / D. Kolarič

63 Investigation of the influence of friction pairs geometrical parameters of wagon truck spring - frictional set on the effectiveness of their operation / Kh. Turanov, O. Cherepov, K. Irgashev

87 Urban freight concepts and practice: would a traditional UCC scheme work? / T. Zunder, M. Marinov

97 Cassette pontoon bridge of high mobility / A. Derewonko, T. Niezgoda, K. Kosiorczenko, P. Bogusz

105 Faults of duty vehicles in the aspects of securing safety / J. Filipczyk

111 Approaches towards airport economic performance measurement / I. Stryčeková

119 The sales of empty legs in business aviation / M. Belorid

129 Influence of temperature changes on torsional rigidity and damping coefficient of rubber torsional vibration damper / W. Homik

nr 2

5 Optimization of existing transport services-case study of the Niko Transport d.o.o. Company / I. Trupac, E. Twrdy
13 Junction turning ratios route planner module for TRANSIMS / M. Maciejewski
21 The possibility of solving cycling transport in central urban areas / A. Kalašoyá, Z. Krchová
27 How to measure capabilities within corridors? / T. Macoun, U. Leth
35 Damping parameters of suspension of passenger vehicle equipped with semi-active dampers with by-pass valve / G. Śląski
43 Dynamic processes during monorail locomotive rocking and their impact on draw gear characteristics / V. Gutarevich
51 Methodology in research: how to assure reliability and validity of constructs in logistics research / A. Križman
59 Sustainable go-green logistics solutions for Instanbul metropolis / A. Angheluta, C. Costea
71 Operating the railway traffic control system / A. Pepevník, D. Kolarič
79 Working out of generalized dynamic model of cargo fixation with cargo pads jointly with flexible and thrust elements under the action spatial force system / K. Turanov, E. Timukhina
89 Additional training of drivers / T. Węgrzyn, B. Szczucka-Lasota, J. Kamińska
93 Diagnostics of combustion engines using wear and degradation processes modeling / J. Stodola
107 The new devices of gas-turbine engines of ground transport on the basis cascade pressure exchanger of Krajniuk / A. Krajniuk
121 Exhaust emission from combat vehicle engines during start and warm-up / J. Merkisz, L. Pielecha, J. Pielecha, M. Szukalski

Optimal routes scheduling for municipal waste disposal garbage trucks using evolutionary algorithm and artificial immune system / B. Mrówczyńska

Mobility management concept and examples of its usage in polish conditions / K. Nosal

Integration of public transport in polish and EU documents and examples of solutions for integration of public transport in Poland and in the world / K. Solecka

Transport fire safety engineering in the European Union - project TRANSFEU / J. M. Radziszewska-Wolińska

Past and future of a regional railway network in Mezohegyes (Hungary) area / B. Zsoter, J. Gal, A. Veha, E. Gyimes

Methods of mathematical modeling of the take-off operation of a commercial aircraft / K. Beuth-Jakubowska, A. Stelmach

Optimal stabilisation of platforms suspended by ropes using the frequency converter control method / S. Chwastek

Simulation of control drives in a tower crane / W. Solarz, G. Tora

Study of bus driving parameters on urban route / F. Dashdamirov

"Movable platform" - the idea and energy consumption / D. Gąska, J. Margielewicz, Cz. Pypno

An analysis of the relationships among selected operating and maintenance parameters of vehicles used in a transportation company / P. Droździel, H. Komsta, L. Krzywonos

Level implementation of digital tachograph system in Europe in light of introduction of digital tachograph second generation / M. Rychter

The effect of the electrification of sand on the interaction of friction in tribological contact / N. Gorbunov, A. Kostyukevich, K. Kravchenko, M. Kovtanets

Research of the stopping distance for different road conditions / D. Lyubenov

The use of Unmanned Aircraft Systems (UAS) in combat operations / T. Gugała

Concept of the dealer-service network management on the system approach basis / I. Makarova, R. Khabibullin, P. Buyvol, E. Belyaev
