

CZASOPISMO TECHNICZNE. NAUKI PODSTAWOWE

R. 111 - 2014

SPIS TREŚCI

nr 1(7)NP

- 3 Foreword
- 5 The famous mathematician of Lithuanian University Otto Theodor Volk (1892-1989) / **J. Banionis**
- 13 Access of higher education and study for Poles in the second half of 19th century / **K. Bartnicka**
- 37 The role of czech mathematicians in the Balkans (1850-1900) / **M. Bečvářová**
- 59 On mathematical lectures at the Jagiellonian University in the years 1860-1918. Essay based on manuscripts / **D. Ciesielska, S. Domoradzki**
- 73 The origins of the Moscow school of the theory of functions / **S.S. Demidov**
- 85 On some aspects of the set theory and topology in J. Puzyna's monumental work / **S. Domoradzki, M. Zarichnyi**
- 99 Some remarks concerning reception of mathematics in Central-Eastern Europe in the years 1850-1920 / **R. Duda**
- 107 Władysław Zajączkowski and differential equations in Poland in the second half on the nineteenth century / **J. Koroński**
- 119 Mathematical publications in the Annals of the Cracow Scientific Society (1817-1872) / **J. Koroński**
- 125 Mathematical publications in the Memoirs of the Academy of Arts and Sciences in Cracow (1872-1894) / **J. Koroński**
- 131 A note on mathematical publications of Polish mathematicians in the Memoirs of the Society of Exact Sciences in Paris (1870-1882) / **J. Koroński**
- 137 Swiss experiences of Ignacy Mościcki / **H. Lichocka**
- 151 Chemical ideas and the development of chemical and petroleum industry on the Polish territory since 1850 to 1920 / **R. Mierzecki**
- 159 History of descriptive geometry with an emphasis to the boom of descriptive geometry in Austro-Hungarian Empire in the 19th century / **V. Moravcová**
- 177 Remarks on non-Euclidean geometry in the Austro-Hungarian Empire / **K. Munkácsy**
- 185 On the history of logic in the Russian Empire (1850-1917) / **A. Schumann**
- 195 The notion of connectedness in mathematical analysis of XIX century / **G.I. Sinkevich**
- 211 Concepts of a number of C. Méray, E. Heine, G. Cantor, R. Dedekind and K. Weierstrass / **G.I. Sinkevich**
- 225 Jan Jędrzejewicz — a professional among amateur astronomers / **M. Siuda-Bochenek**
- 233 Lucjan Emil Böttcher (1872-1937) - the Polish pioneer of holomorphic dynamics / **M. Stawiska**
- 245 The reception of logic in Poland: 1870-1920 / **J. Woleński**
- 255 Polish physicists and the progress in physics (1870-1920) / **A.K. Wróblewski**

- 3 Existence and Uniqueness of Solutions of the Dirichlet Nonlocal Problem with Nonlocal Initial Condition / **Ludwik Byszewski, Teresa Winiarska**
- 9 Integro-Differential Evolution Nonlocal Problem for the First Order Equation (II) / **Ludwik Byszewski, Teresa Winiarska**
- 15 On Nonlocal Evolution Functional-Differential Problem in a Banach Space / **Ludwik Byszewski, Teresa Winiarska**
- 37 Missing Data Analysis in Cyclostationary Models / **Christiana Drake, Oskar Knapik, Jacek Leśkow**
- 37 Cycles Containing Specified Edges in a Graph / **Grzegorz Gancarzewicz**
- 45 Graphs with Every Path of Length k in a Hamiltonian Cycle / **Grzegorz Gancarzewicz**
- 59 The Existence of a Weak Solution of the Semilinear First-Order Differential Equation in a Banach Space / **Mariusz Juźyniec**
- 63 Adaptive Unstructured Solution to the Problem of Elastic-Plastic Hardening Twist of Prismatic Bars / **Jan Kucwaj**
- 81 Application of the 3D Objects Surface Shape Analysis Algorithms in Biomedical Engineering / **Mateusz Matan**
- 99 Teaching, Modeling and Visualisation of Ordinary Differential Equations / **Zbigniew Mrozek**
- 113 Max-Plus Linear System in Control of Data Processing / **Jerzy Raszka, Lech Jamroż**
- 129 Data-Driven Score Test of Fit for Class of Garch Models / **Bartosz Stawiarski**

MATHEMATICS

- 5 A new approach to bounded linear operators on $C(\omega^*)$ / **M. Grzech**
9 Some remarks on non-separable gaps in $P(\omega)/\text{fin}$ / **M. Grzech**
13 Some remarks on Hausdorff gaps and automorphisms of $P(\omega)/\text{fin}$ /
M. Grzech
21 The degree of approximation of functions from exponential weight spaces /
M. Herzog
31 An investigation of the approximation of functions of two variables by the
poisson integral for Hermite expansions / **G. Krech**
39 Simple chooser options with Maple / **A. Milian**

PHYSICS

- 51 Monte Carlo simulations of the Ising model on a square lattice with
random Gaussian interactions / **R. Gebarowski**
59 Relaxation currents in the non-morphotropic region of PZT-PFS
ferroelectric ceramics / **A. Osak**
67 Optimal investment horizons for the main indices of the Warsaw Stock
Exchange / **A. Szmagliński, G. Czajkowski**
75 The structure of neutron stars with localized protons / **W. Wójcik**
81 Temperature evolution of thermodynamic functions from symmetric to
asymmetric nuclear matter / **W. Wójcik**
89 Temperature dependence of proton localization for Skyrme nuclear
interactions / **W. Wójcik**

COMPUTER SCIENCE

- 97 Multivariate function approximation using sparse grids and high
Dimensional Model Representation – a comparison / **M. Baran**
109 Parallelization of the Levenshtein distance algorithm / **A. Niewiarowski,**
M. Stanuszek
123 Characteristics of the context-driven meta-modeling paradigm (CDMM-P) /
P. Zabawa, M. Stanuszek
