nr 1

NONDESTRUCTIVE TESTING IN CIVIL ENGINEERING / Xavier Derobert, Herbert Wiggenhauser, Odile Abraham

INTRODUCTION
1 Special Issue on Nondestructive Testing in Civil Engineering / Xavier Derobert, Herbert Wiggenhauser, Odile Abraham

TECHNICAL PAPERS
2 Use of Complex Resistivity Tomography for Moisture Monitoring in a Flooded Masonry Specimen / Sabine Kruschwitz, Ernst Niederleithinger, Christiane Trela, Jens Wostmann
12 Rapid Bridge Deck Condition Assessment Using Three-Dimensional Visualization of Impact Echo Data / Nenad Gucunski, Michelle Yan, Zhe Wang, Tong Fang, Ali Maher
25 Assessment of Deteriorated Concrete Cover by Combined While-Drilling Techniques / Roberto Felicetti

CASE STUDIES
47 Nondestructive Assessment of Axial Load-Deflection Behavior of Drilled Shafts for a Suspension Bridge / Federico Pinto, Carlos F. Gerbaudo, Carlos A. Prato
TECHNICAL PAPERS
57 Improving the Assessment of Economic Foreign Exchange Exposure in Public-Private Partnership Infrastructure Projects / Matthias Ehrlich, Robert L. K. Tiong
68 Modeling Geospatial Interdependence for Integrated Municipal Infrastructure / Tushith Islam, Osama Moselhi
89 Comprehensive Study on Using Externally Bonded FRP Composites for the Rehabilitation of Reinforced Concrete T-Beam Bridges / Julio F. Davalos, An Chen, Indrajit Ray, Jeffrey R. Levan
103 Implementation of LRFD of Drilled Shafts in Louisiana / Xinbao Yu, Murad Y. Abu-Farsakh, Sungmin Yoon, Ching Tsai, Zhongjie Zhang
113 Intelligent Transportation Systems and NO2 Emissions: Predictive Modeling Approach Using Artificial Neural Networks / Dinesh Gupta, Louis F. Cohn
119 Evaluation of On-Site Fuel Use and Emissions over the Duration of a Commercial Building Project / William Rasdorf, Phil Lewis, Steven Kelly Marshall, Ingrid Arocho, H. Christopher Frey
130 Smart Garage Development Problem: Model Formulation and Solution Approach / Seok Kim and Ivan Damnjanovic
146 Modeling Failure of Wastewater Collection Lines Using Various Section-Level Regression Models / Boris Salman, Ossama Salem

CASE STUDIES
TECHNICAL PAPERS

176 Random Parameters Seemingly Unrelated Equations Approach to the Postrehabilitation Performance of Pavements / Panagiotis Ch. Anastasopoulos, Fred L. Mannering, John E. Haddock

183 Incorporating Delay Effects into Airport Runway Pavement Management Systems / Bo Zou, Samer Madanat

194 Optimization of Short-Term On-Street Park-Pay License Plate Surveying / Deo Chimba, Mbakisya Onyango

202 Rehabilitation of Aging Water Infrastructure Systems: Key Challenges and Issues / Ariamalar Selvakumar, Anthony N. Tafuri

210 Risk Allocation in Public-Private Partnership Infrastructure Projects in Developing Countries: Case Study of the Tehran-Chalus Toll Road / Gholamreza Heravi, Zeinab Hajihosseini

CASE STUDIES

218 Government Supports in Public-Private Partnership Contracts: Metro Line 4 of the Sao Paulo Subway System / Luiz E. Brandao, Carlos Bastian-Pinto, Leonardo Lima Gomes, Marina Lobes

DISCUSSIONS AND CLOSURES

226 Discussion of "Probability of Failure Analysis due to Internal Corrosion in Cast-iron Pipes" / Hamid Yamini, Barbara J. Lence Alex Margevicius
nr 3

Infrastructures in a Changing Environment / Claus Doll, James Chu, Farideh Ramjerdi, and Kenneth Kuhn

229 Special Issue on Infrastructures in a Changing Environment / Claus Doll, James Chu, Farideh Ramjerdi, and Kenneth Kuhn

TECHNICAL PAPERS

232 Urban Sprawl and Local Infrastructure in Japan and Germany / Stefan Klug and Yoshitsugu Hayashi

242 Spending Scarce Funds More Efficiently—Including the Pattern of Interdependence in Cost-Benefit Analysis / Eckhard Szimba and Werner Rothengatter

252 Spatial Incidence of Economic Benefit of Road-Network Investments: Case Studies under the Usual and Disaster Scenarios / Atsushi Koike, Lori Tavasszy, Keisuke Sato, and Toshiyuki Monma

261 Cost-Benefit Analysis and the Optimal Timing of Road Infrastructures / Pedro Godinho and Joana Dias

270 Pavement Network Maintenance Optimization Considering Multidimensional Condition Data / Kenneth D. Kuhn

278 Developing a Transnational Biofuels Refueling Infrastructure: EU Biofuels Corridors / Matthijs Schraven, Ming Chen, Nina Nesterova, and Jarl Schoemaker

288 Emergency Evacuation Guidance Design for Complex Building Geometries / James C. Chu and Chau-Yuan Yeh

297 New Approach for the Assessment of High-Speed Rail Projects and How to Contain Cost Overruns: Lessons from the EVA-TREN Project / Tristan Chevroulet, Liana Giorgi, and Christian Reynaud

305 High-Speed Rail Opportunities around Metropolitan Regions: Madrid and London / Maddi Garmendia, Vicente Romero, José Maria de Ureña, José María Coronado, and Roger Vickerman

314 Heuristic Analysis of the Effective Range of a Track Tamping Machine / Rui Santos and Paulo Fonseca Teixeira

Oprac. BPK
