48 Q&A. AEI talks with Mazda's Derek Jenkins

FEATURES
32 Chrysler's new Tigershark 14s aim for refinement, efficiency
Developed in record time, the 2.0- and 2.4-L debut in the 2013 Dodge Dart. The 2.4-L features the first global application of MultiAir II technology. POWERTRAIN
35 Honda unveils next-gen motorcycle powertrains
New engines designed for low-speed torque, fuel efficiency, and riding "character" are coupled with new DCT and CVT transmissions. POWERTRAIN
38 Alternative fuels on bumpy road
The price of conventional fuels is just one variable that makes it hard to know when fuel-cell, biofuel, and natural-gas technologies will come into their own. ENERGY | POWERTRAIN
41 Regen braking gets a boost
Researchers from Hyundai Mobis detail the development of smart booster brake systems for regenerative brake cooperative control. CHASSIS
Efficient & effective leadership
Frank O. Klegon, a 30-year SAE member and former product development VP at Chrysler, brings 'customer first' approach to term as SAE International's chief elective officer. PEOPLE

FEATURES
28 Automotive Engineering International 2012 SAE World Congress Tech Awards
The editors of Automotive Engineering International preview the most innovative supplier technologies to be displayed April 24-26 in Detroit at the SAE 2012 World Congress. The top five are highlighted in this edition, but additional technologies and other event coverage can be viewed online at www.sae.org/mags/aei/saewc.

35 The quest for better turbocharger compressors
With the prevalence of automotive engine downsizing for better efficiency and emissions, greater emphasis is being placed on turbo aerodynamics to achieve wider-range and high-efficiency single-stage compressors.

42 HCCI: The search for a better burn continues
A Bosch-led consortium sponsored by the U.S. DOE, and a research team at Sandia National Laboratories, are pushing to unlock the fuel-efficiency potential of the elusive homogeneous-charge compression ignition engine.

48 Illumination is the new interior sensation
The versatility of LEDs gives stylists many options while raising many challenges for engineers.
New refrigerant nears mass production
The Cadillac XTS model comes out in late spring, with the ATS to follow in mid-summer with the new R-1234yf A/C refrigerant. Behind the scenes, regulatory paperwork issues have delayed production from a DuPont-Honeywell joint venture plant in China, and an SAE committee chairman has asked the EPA to expedite approvals for service equipment.

40 Q&A
AEI talks with Ford’s Ron Razzano

FEATURES
19 Raj Nair's world's-eye view
Ford's new global product-development chief discusses engineering resources to meet Asia-Pacific growth, China's challenges, U. S. CAFE, and lightweighting full-size trucks.
22 Raising the bar on SI engine efficiency
26 GE makes power play into automotive
The iconic American conglomerate sees great potential in electric vehicles, helping utility customers upstream ensure reliable and efficient energy delivery for EV customers downstream, says GE's Mark Little.
28 Hybrid-electrified Le Mans. MOTORSPORTS | POWERTRAIN
Audi and Toyota bring hybrid-electric racecars to the renowned 24-h race.
33 Aerodynamic development of Model S
BODY | TESTING & SIMULATION
Tesla Motors closely integrates its Design and Engineering groups to process design iterations quickly and enable fully informed development of aero-optimized exterior surfaces.

FEATURES
20  Light and mighty
   Finding innovative ways to reduce vehicle weight while maintaining vehicle
   safety will be key to achieving the 2025 fuel-economy target. MATERIALS
26  Controllers bulk up to manage engine's intricacies
   Chips hold more memory and boost throughput to help improve fuel
   efficiency. ELECTRONICS | POWERTRAIN
30  Electric Renault also focused on internal combustion
   Already becoming known in Europe as the "electric company," Renault,
   together with Alliance partner Nissan, is determined to pursue EV solutions
   but in parallel with intensive ICE programs, says Philippe Klein, Renault's
   Vice President, Corporate Planning, Product Planning, and Programs.
38  Volvo plugs into high technology
   The company may be on a high-technology roll with its new plug-in diesel
   hybrid and its shift to a maximum four-cylinder philosophy - with three-
   cylinder units likely, according to Peter Mertens, Senior Vice President
   of Research & Development.
42  Finding the Bentley solution without compromise
   Engineering Director Rolf Frech reveals how technology sharing within the
   VW Group contributes to the company's luxury cars achieving greater
   efficiency.
46  Putting auto industry R&D into neutron gear
   At the Rutherford Appleton Laboratory, home of the U. K. 's Space
   Innovation Center and ISIS Neutron Source, "downsizing" is taking
   automotive research into a whole new league thanks to research scientists
   such as Dr. Martyn Bull.

28 Big Picture
Lightweight and safe Cadillac ATS

FEATURES

Hew Vehicle Technology. HIGHLIGHTS
24 A compact Cadillac to beat the Bimmers
General Motors engineers were given a clean sheet to develop the 2013 ATS, Cadillac's all-new compact (and light) sport sedan aimed squarely at the 3 Series benchmark.

36 Re-engineered Ram
Thermal management—along with other significant changes—improves Ram 1500 fuel economy and earns EPA off-cycle credits.

40 Honda Accord—the 9th generation
The all-new 2013 model brings direct injection, a new CVT, MacPherson struts, safety advances, and a plug-in hybrid version.

47 Radios expand by turning to micros
Versatile systems use microcontrollers, software to meet wide range of requirements.

50 Heavy on the lightweighting
Weight reduction is already a significant consideration in companies' product development efforts, and the emphasis is only going to increase in the years ahead, according to SAE-member survey respondents.

40  Q&A
AEI talks with Cummins' Neil Pattison

FEATURES
22  Big shifts coming in powertrains
During the rest of this decade, many observers expect transmission controls to undergo more changes than in the past 10-15 years. Transmission controls are being revamped to meet tighter fuel economy laws, letting engines run at optimal speeds.

26  Collaborating for cheaper carbon fiber
Oak Ridge National Laboratory and several industry partners work together to overcome the challenges to lower-cost carbon fiber.

32  Creating the 54.5-mpg car
Part 2 of AEI's three-part series looks at how vehicle engineers are facing a "stress test" as the countdown to 2025 CAFE begins. How will the aggressive new regulations influence U.S. passenger cars in the next decade - and what will they cost to implement?
