

COMPUTER-AIDED CIVIL AND INFRASTRUCTURE ENGINEERING

Vol. 27 - 2012

SPIS TREŚCI

nr 1

- 1 Expanding with a Lofty Goal / **Hojjat Adeti**
- 2 A Decentralized Control Algorithm for Large-Scale Building Structures / **Ying Lei, D.J. Wu, Y Lin**
- 14 Comparing Ant Colony Optimization and Genetic Algorithm Approaches for Solving Traffic Signal Coordination Under Oversaturation Conditions / **Rahul Put ha, Luca Quadrifoglio, Emily Zechman**
- 29 Concrete Crack Detection by Multiple Sequential Image Filtering / **Takafumi Nishikawa, Junji Yoshida, Toshiyuki Sugiyama, Yozo Fujino**
- 48 Active and Semi-active Adaptive Control for Undamaged and Damaged Building Structures Under Seismic Load / **Maryam Bitaraf, Stefan Hurlebaus, Luciana R. Barroso**

INDUSTRIAL APPLICATION

- 65 Using Numerical Simulations and Engineering Reasoning under Uncertainty: Studying the Collapse of WTC-1 / **Ayhan Irfanoglu**

- 77 Optimal Routing with Multiple Objectives: Efficient Algorithm and Application to the Hazardous Materials Transportation Problem / **ChiXie, S. Travis Waller (USA)**
- 95 Multi-objective Optimization of Sensor and Excitation Layouts for Frequency Response Function-Based Structural Damage Identification / **Anne M. Raich, Tamas R. Liskai**
- 118 An Unmanned Aerial Vehicle-Based Imaging System for 3D Measurement of Unpaved Road Surface Distresses / **Chunsun Zhang and Ahmed Elaksher**
- 130 MOST-FIT: Support Techniques for Inspection and Life Cycle Optimization in Building Asset Management / **Tarek Hegazy, Ahmed Elhakeem, Shipra Singh Ahluwalia, Mohamed Attalla**

INDUSTRIAL APPLICATION

- 143 Parametric Study on the Interface Layer of Renovation Solutions for Orthotropic Steel Bridge Decks / **Sofia Teixeira de Freitas, Henk Kolstein, Frans Bijlaard**

- 155 Trend Curve Optimal Control Model for Optimizing Pavement Maintenance Strategies Consisting of Various Treatments / **Mohammad Mamunur Rashid, Koji Tsunokawa**
- 170 A Refined Methodology for Durability-Based Service Life Estimation of Reinforced Concrete Structural Elements Considering Fuzzy and Random Uncertainties / **M. B. Anoop, B. K. Raghuprasad, K. Balaji Rao**
- 187 Crack Detection from the Slope of the Mode Shape Using Complex Continuous Wavelet Transform / **Xin Jiang, Zhongguo John Ma, Wei-Xin Ren**
- 202 Operational Modal Parameter Identification from Power Spectrum Density Transmissibility / **Wang-Ji Yan, Wei-Xin Ren**
- 218 Dynamic Parameter Identification of Secondary Mass Dampers Based on Full-Scale Tests / **Bong-Ho Cho, Ji-Seong Jo, Seok-Jun Joo, Hongjin Kim**

- 231 A Dynamic Route Choice Model Considering Uncertain Capacities / **Man Wo Ng, S. Travis Waller**
- 244 Automatic Road Defect Detection by Textural Pattern Recognition Based on AdaBoost / **Aurelien Cord, Sylvie Chambon**
- 260 Influence of the Tunnel Shape on Shotcrete Lining Stresses / **Fabrizio Barpi, Daniele Peila**
- 276 Network-Level Road Pavement Maintenance and Rehabilitation Schedule for Optimal Performance Improvement and Budget Utilization / **Lu Gao, ChiXie, Zhanmin Zhang, S. Travis Waller**
- 288 Comparing Delay Minimization and Emissions Minimization in the Network Design Problem / **Erin M. Ferguson, Jennifer Duthie, S. Travis Waller**
- 303 A Polynomial Parametric Curve (PPC-CURVE) for the Design of Horizontal Geometry of Highways / **G. Bosurgi, A. D Andrea**

Building and Tower Structures

- 313 Introduction / **Konrad Zilch**
- 314 Hybrid Time-Frequency Blind Source Separation Towards Ambient System Identification of Structures / **B. Hazra, A. Sadhu, A. J. Roffel, S. Narasimhan**
- 333 Strengthening and Rehabilitation of Reinforced Concrete Slabs with Carbon-Fiber Reinforced Polymers Using a Refined Bond Model / **Wolfgang Finckh, Konrad Zilch**
- 347 The Influence of Reflected Solar Glare Caused by the Glass Cladding of a Building: Application of Caustic Curve Analysis / **Marcin Brzezicki**
- 358 Industrial Applications Vulnerability and Robustness of a Security Skyscraper Subjected to Aircraft Impact / **Markus Nöldgen, Ekkehard Fehling, Werner Riedel, Klaus Thoma**
- 369 Design of High Rise Steel Buildings against Terrorist Attacks / **Max Gundel, Benno Hoffmeister, Markus Feldmann, Bernhard Hauke**

nr 6
Structures

- 385 Risk Management of Large RC Structures within Spatial Information System / **Jianjun Qin, Michael Havbro Faber**
- 406 Modeling of Tension Stiffening Behavior in FRP-Strengthened RC Members Based on Rigid Body Spring Networks / **Jian-Guo Dai, Tamon Ueda, Yasuhiko Sato, Kohei Nagai**
- 419 Multicut-High Dimensional Model Representation for Structural Reliability Bounds Estimation Under Mixed Uncertainties / **A. S. Balu, B. N. Rao**
- 439 Wavelet-Based Detection of Beam Cracks Using Modal Shape and Frequency Measurements / **JiaweiXiang, Ming Liang**

INDUSTRIAL APPLICATION

- 455 Performance Evaluation of TMD under Typhoon Using System Identification and Inverse Wind Load Estimation / **Namcheol Kang, Hongjin Kim, Sunyoung Choi, Seongwoo Jo, Jae-Seung Hwang, Eunjong Yu**

Transportation Engineering

- 476 A Generalized Framework for Parallelizing Traffic Sign Inventory of Video Log Images Using Multicore Processors / **Yichang Tsai, Yuchun Huang**
- 494 Integration of Environmental Objectives in a System Optimal Dynamic Traffic Assignment Model / **H. M. Abdul Aziz, Satish V. Ukkusuri**
- 512 User Equilibrium with Recourse: Continuous Network Design Problem / **Avinash Unnikrishnan, Dung-Ying Lin**
- 525 Lane-Changing Behavior on Urban Streets: An "In-Vehicle" Field Experiment-Based Study / **Daniel (Jian) Sun, Lily Elefteriadou**
- 543 Determining an Optimal Maintenance Period for Infrastructure Systems / **Xueqing Zhang, Hui Gao**

- 555 Consistent Point Clouds of Narrow Spaces Using Multiscan Domain Mapping / **Kuldeep K. Sareen, George K. Knopf, and Roberto Canas**
- 573 Optical Analysis of Strength Tests Based on Block-Matching Techniques / **Alvaro Rodriguez, Juan R. Rabunai, Juan L. Perez, and Fernando Martinez-Abella**
- 594 A Spatial-Bayesian Technique for Imputing Pavement Network Repair Data / **Siamak Saliminejad and Nasir G. Gharaibeh**
- 608 Fuzzy Representation of Pavement Condition for Efficient Pavement Management / **Aiessandra Bianchini**
- 620 Control of Structural Response Under Earthquake Excitation / **Unal Aldemir, Arcan Yanik, Mehmet Bakioglu**

- 639 Introduction / **James L. Beck, Wolfgang Graf, Christian Soize**
- 640 Structural Analysis with Fuzzy Data and Neural Network Based Material Description / **W. Graf, S. Freitag, J.-U. Sickert, M. Kaliske**
- 655 Genetic Algorithms for the Dependability Assurance in the Design of a Long-Span Suspension Bridge / **Luca Sgambi, Konstantinos Gkoumas, and Franco Bontempi**
- 676 Structural Reliability Assessment by Local Approximation of Limit State Functions Using Adaptive Markov Chain Simulation and Support Vector Regression / **Hongzhe Dai, Hao Zhang, Wei Wang, Guofeng Xue**
- 687 MUSIC-ANN Analysis for Locating Structural Damages in a Truss-Type Structure by Means of Vibrations / **Roque A. Osornio-Rios, Juan Pablo Amezcua-Sanchez, Rene J. Romero-Troncoso, and Arturo Garcia-Perez**
- 699 Signal Pattern Recognition for Damage Diagnosis in Structures / **Long Qiao, Asad Esmaeily, Hani G. Melhem**
- 711 Generation of Near-Field Artificial Ground Motions Compatible with Median-Predicted Spectra Using PSO-Based Neural Network and Wavelet Analysis / **G. Ghodrati Amiri, A. Abdolahi Rad, S. Aghajari, N. Khanmohamadi Hazaveh**

- 731 A Bi-Level Model for Planning Signalized and Uninterrupted Flow Intersections in an Evacuation Network / **Yue Liu, Zhenke Luo**
- 748 Agent-Based Modeling of Behavioral Housing Recovery Following Disasters / **All Nejat, Ivan Damnjanovic**
- 764 Neuro-Fuzzy Cost Estimation Model Enhanced by Fast Messy Genetic Algorithms for Semiconductor Hookup Construction / **Fan-Yi Hsiao, Shih-Hsu Wang, Wei-Chih Wang, Chao-Pao Wen, Wen-Der Yu**
- 782 Using Probabilistic Methods to Estimate the Public Sector Comparator / **Carlos Oliveira Cruz, Rui Cunha Marques**
- 801 Contents of Volume 27
- 805 Author Index to Volume 27
