1. Multiscale finite element method applied to detached-eddy simulation for computational wind engineering / Yue Zhang, Rooh A. Khurram and Wagdi G. Habashi
21. Full-scale experiments of cantilever traffic signal structures / Héctor J. Cruzado and Chris Letchford
43. Statistical characteristics of sustained wind environment for a long-span bridge based on long-term field measurement data / Youliang Ding, Guangdong Zhou, Aiqun Li and Yang Deng
69. Wind loading on trees integrated with a building envelope / Aly Mousaad ALY, Fabio Fossati, Sara Muggiasca, Tommaso Argentini, Girma Bitsuamlak, Alberto Franchi, Nicola Longarini, Pietro Crespi and Arindam Gan Chowdhury
87. Numerical simulation of the neutral equilibrium atmospheric boundary layer using the SST k-ω turbulence model / Peng Hu, Yongle Li, C.S. Cai, Haili Liao and G.J. Xu
107. Maximum vortex-induced vibrations of a square prism / A. Barrero-Gil and P. Fernandez-Arroyo
A proposed model of the pressure field in a downburst / Z. Tang and L.Y. Lu
Characterization of open and suburban boundary layer wind turbulence in 2008 Hurricane Ike / S. Jung and F.J. Masters
Experimental and numerical studies of aerodynamic forces on vehicles and bridges / Yan Han, Jiexuan Hu, C.S. Cai, Zhengqing Chen and Chunguang Li
Roof tile fragility and puncture of metal window shutters / Sylvia T. Laboy-Rodriguez, Daniel Smith, Kurtis R. Gurley and Forrest J. Masters
Analysis on running safety of train on bridge with wind barriers subjected to cross wind / T. Zhang, H. Xia and W.W. Guo
Predicting of tall building response to non-stationary winds using multiple wind speed samples / Guoqing Huang, Xinzong Chen, Haili Liao and Mingshui Li
The acrosswind response of the downwind prism in a twin-prism system with a staggered arrangement / Fuh-Min Fang, Cheng-Yang Chung, Yi-Chao Li, Wen-Chin Liu and Perng-Kwei Lei

Prediction of bridge flutter under a crosswind flow / Tan-Van Vu, Ho-Yeop Lee, Byung-Ho Choi and Hak-Eun Lee

Numerical simulation of wind loading on roadside noise mitigation structures / K.T. TSE, Yi Yang, K.M. Shum and Zhuangning Xie

Yaw wind effect on flutter instability of four typical bridge decks / Le-Dong Zhu, You-Lin Xu, Zhenshan Guo, Guang-Zhao Chang and Xiao Tan

Response evaluation of historical crooked minaret under wind and earthquake loadings / Ali Ural, Adem Doğangün and Şakir Meraki
361 Developments and applications of a modified wall function for boundary layer flow simulations / Jian Zhang, Qingshan Yang and Q.S. Li

379 Numerical studies on non-shear and shear flows past a 5:1 rectangular cylinder / Qiang Zhou, Shuyang Cao and Zhiyong Zhou

399 Analysis and active control for wind induced vibration of beam with ACLD patch / Jinqiang Li and Yoshihiro Narita

419 Wind profiles of tropical cyclones as observed by Doppler wind profiler and anemometer / Y.C. He, P.W. Chan and Q.S. Li

435 Vehicle-induced aerodynamic loads on highway sound barriers part 1: field experiment / Dalei Wang, Benjin Wang and Airong Chen

451 Nonlinear structural system wind load input estimation using the extended inverse method / Ming-Hui Lee
465 Effect of parapets to pressure distribution on flat top of a finite cylinder / Y. Ozmen
479 Vehicle-induced aerodynamic loads on highway sound barriers part 2: numerical and theoretical investigation / Dalei Wang, Benjin Wang and Airong Chen
495 Development and validation of a numerical model for steel roof cladding subject to static uplift loads / Amy C. Lovisa, Vincent Z. Wang, David J. Henderson and John D. Ginger
515 Experimental and numerical studies of the flow around the Ahmed body / Tural Tunay, Besir Sahin and Huseyin Akilli
537 Effect of a vertical guide plate on the wind loading of an inclined flat plate / Kung-Ming Chung, Chin-Cheng Chou, Keh-Chin Chang and Yi-Jun Chen
553 A method for nonlinear aerostatic stability analysis of long-span suspension bridges under yaw wind / Wen-Ming Zhang, Yao-Jun Ge and Marc L. Levitan
Investigation on vortex-induced vibration of a suspension bridge using section and full aeroelastic wind tunnel tests / Yanguo Sun, Mingshui Li and Haili Liao

Along-wind simplified analysis of wind turbines through a coupled blade-tower model / Andrea Spagnoli and Lorenzo Montanari

Full-scale measurements of wind effects and modal parameter identification of Yingxian wooden tower / Bo Chen, Qingshan Yang, Ke Wang and Linan Wang

Development of a methodology for damping of tall buildings motion using TLCD devices / Giorgio Diana, Ferruccio Resta, Diego Sabato and Gisella Tomasini

Computational study of a small scale vertical axis wind turbine (VAWT): comparative performance of various turbulence models / Lazaros Aresti, Mustafa Tutar, Yong Chen and Rajnish K. Calay

Aeroelastic investigation of a composite wind turbine blade / Roham Rafiee and Mahdi Fakoor
