An optimization model for a crop deficit irrigation system under uncertainty / Ping Guo, Xiaohong Chen, Ling Tong, Jianbing Li and Mo Li

A hybrid interval-parameter fuzzy robust programming method and its application to filter management strategy in fluid power systems / S.L. Nie, H. Ji, Y.Q. Huang, Y.R Li and G.H. Huang

Customized evolutionary optimization procedure for generating minimum weight compliant mechanisms / Deepak Sharma, Kalyanmoy Deb and N.N. Kishore

Discrete size optimization of steel trusses using a refined big bang-big crunch algorithm / O. Hasançebi and S. Kazemzadeh Azad

Trajectory optimization for unmanned aerial vehicle formation reconfiguration / Hyoung-seok Kim and Youdan Kim

Designing an optimal water quality monitoring network for river systems using constrained discrete optimization via simulation / Chuljin Park, Ilker T. Telci, Seong-Hee Kim and Mustafa M. Aral

Two-edge disjoint survivable network design problem with relays: a hybrid genetic algorithm and Lagrangian heuristic approach / Abdullah Konak

Multi-objective robust design of energy-absorbing components using coupled process-performance simulations / All Najafi, Erdem Acar and Masoud Rais-Rohani

A comparison of rescheduling policies for online flow shops to minimize tardiness / Henri Tokola, Lauri Ahlroth and Esko Niemi

Revolute manipulator workspace optimization using a modified bacteria foraging algorithm: A comparative study / S. Panda, D. Mishra, B.B. Biswal and M. Tripathy

Engineering system co-design with limited plant redesign / James T. Allison

Constrained optimization by radial basis function interpolation for high-dimensional expensive black-box problems with infeasible initial points / Rommel G. Regis

Topology optimization of continuum structures with bi-modulus materials / Kun Cai, Zhaoliang Gao and Jiao Shi

A demonstration of the improved efficiency of the canonical coordinates method using nonlinear combined heat and power economic dispatch problems / Hung-Chieh Chang and Pei-Chun Lin

Agricultural farming planning and water resources management under fuzzy uncertainty / Y. Xu, G.H. Huang and L.G. Shao

Cash transportation vehicle routing and scheduling under stochastic travel times / Shangyao Yan, Sin-Siang Wang and Yu-Hsuan Chang

Solving the dynamic berth allocation problem by simulated annealing / Shih-Wei Lin and Ching-Jung Ting

Issues in optimal parameter estimation for the nonlinear Muskingum flood routing model / Zong Woo Geem
An accelerated pseudo-genetic algorithm for dynamic finite element model updating / **N. Touat, N. Benseddiq, A. Ghoul and S. Rechak**

Co-evolutionary algorithm: An efficient approach for bilevel programming problems / **Hecheng Li and Lei Fang**

Three-level trade-off analysis for decision making in environmental engineering under interval uncertainty / **Huai-Cheng Guo, Wei Gao and Feng Zhou**

Robust design with imprecise random variables and its application in hydrokinetic turbine optimization / **Zhen Hu, Xiaoping Du, Nitin S. Kolekar and Arindam Banerjee**

The Artificial Bee Colony algorithm in layer optimization for the maximum fundamental frequency of symmetrical laminated composite plates / **M. Kemal Apalak, Dervis Karaboga and Bahriye Akay**

Oprac. BPK
